

How to Use the Classroom Practices Professional Development Video Series

Description:

The WV PBIS School Wide Team has developed a professional development video series focusing on Tier 1 classroom practices for teachers to enhance their skill sets within the classroom. Our goal is to empower school PBIS teams to assess the needs of their building and provide the necessary professional development to their staff. There are various ways that our video series can be utilized. Please see our options listed below.

Options for Use:

- ❖ **PLCs:** Select one classroom practice video to watch per PLC meeting. After staff have watched the selected video and participated in the activity with the video, the administration will assess the knowledge and implementation of that classroom practice during their classroom walkthroughs and provide feedback to the teachers.
- ❖ **Tiered Professional Development:** We recommend using data from classroom practice walkthroughs to differentiate professional development for your staff. Based on the area of need, provide the necessary classroom video for the teacher to watch at their leisure and then allow that teacher an opportunity to demonstrate their knowledge through additional administrative classroom walkthroughs.
- ❖ **TA Request:** You may request Technical Assistance from our team by submitting a TA Request at our link to request in person or virtual training: [Qualtrics Survey | Qualtrics Experience Management](#)

Please reach out to our team if you have any questions regarding how to use the Classroom Practice Professional Development Video Series.
