Building School-Wide Expectations – Rules by Setting

Activity 3: Rules by Setting

As a team:

1. Use your discipline data (office referrals) to identify the top 3 non-classroom locations for problem behavior.
2. Determine the most common problem behavior(s) that occur in each location.
3. Develop **3-5** positively stated, measurable & observable rules to address the problem behaviors in each location.
4. Identify which Tier 1 expectation developed from Activity 2 is addressed by each rule.

* You may only need 1- 2 rules in each setting.

Locations generating the most referrals	Most common problem behavior in this location	Rule to address the problem behavior	Tier 1 Expectation addressed by this rule
